# Eco-system Foundation: TSM Waveform

- Resilient wideband mesh network
  - Barrage Relay™
  - Scalability: 800+ nodes/1.2MHz
  - Rapid deployment: <1 second net entry, <10 second 800 node network forming
  - Robustness: range, dynamics, interference
- Simultaneous voice/PLI/data/video
  - Voice: 16 voice channels, 32 talk groups, 2 simultaneous voice
  - Rapid PLI distribution
  - Multiple HD video streams
- Operational Flexibility:
  - 1.2/3.6/10/20/40 MHz bandwidth options
  - UHF/L/S bands
  - Long Range (LR) & High Data Rate (HDR) capability
- Portability: SDR waveform built from ground up

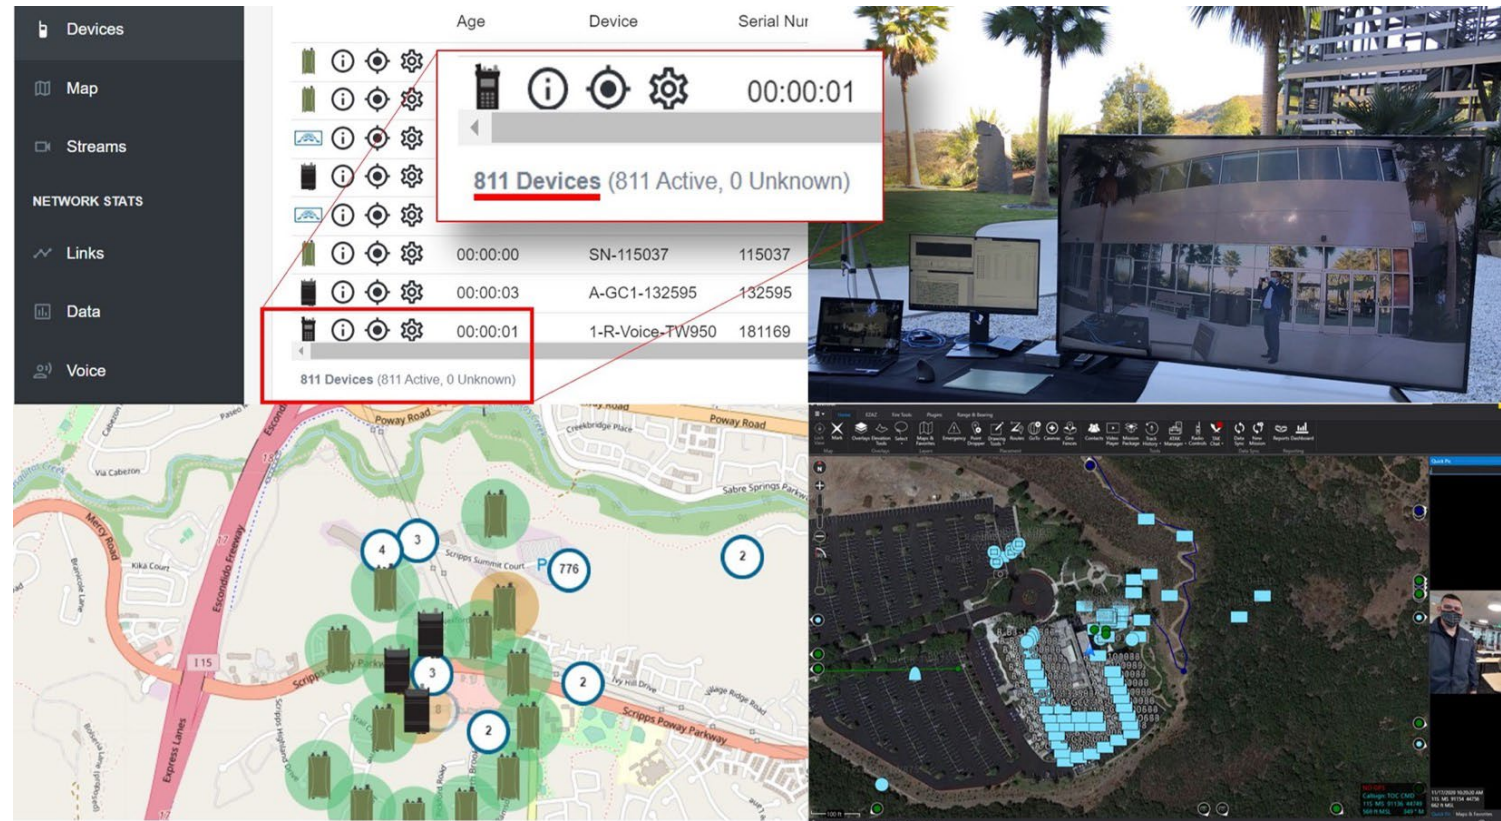

The screenshot shows the TrellisWare Network Management interface. A red box highlights the text "802 Devices (802 Active, 0 Unknown)". Below this is a table of devices with columns for Age, Device, Mode Number, Symbol, Talk Group, Device ID, Noise Floor, Connectivity to NTR, and Location. Below the table is a photo of the hardware equipment.

Age	Device	Mode Number	Symbol	Talk Group	Device ID	Noise Floor	Connectivity to NTR	Location

# TSM 6.2.1 Features

- **High Data Rate (HDR) Mode**
  - Double throughput (16Mbps => 32Mbps)
  - New adaptive OFDM data modem
  - Retain CPM modem for robust voice, PLI and network maintenance
- **Massive Scalability**
  - 800 nodes scalability
  - Ultra efficient network
  - 5 times faster PLI update rate
- **OTAM**
  - Efficient OTA radio management
- **PLI Proxy / External PLI**
  - Efficient OTA distribution of 3<sup>rd</sup> party PLI
- **Packet Processing Rules**
  - Fine grain control of packet flows

# Eco-system Foundation: Katana / WREN NB

- Highly resilient narrowband mesh network
  - Barrage Relay™ for 3 spatial hops
  - ECCM/AJ Protection: fast frequency hopping
    - 50 kHz instantaneous bandwidth
    - Up to 200 MHz frequency hopping bandwidth
  - Scalability: 250+ nodes in single flat network
    - Rapid network formation/join/merge
- Simultaneous voice, PLI, & limited data
  - Voice: up to 128 talk groups, 2 simultaneous voice
  - Rapid PLI distribution
  - Chat & limited data transfer
- Operational Flexibility
  - UHF/L/S bands
  - Simplified IP configuration/planning
- Katana 1.0.0 released Aug 2023
- WREN NB 1.0.0 in testing for release in 2024

# TrellisWare Waveform Capabilities

## TSM™

### Wideband

- Scalable, self-forming, and self-healing MANET using Barrage Relay networking technology
- Configurable bandwidth of **1.2 MHz to 40MHz**
- **Resilient high-throughput solution** for challenging environments
- Proven scalability of over 800 nodes on a flat network using only 1.2 or 3.6MHz of bandwidth
- Dedicated voice & PLI channels
- Supports variety of data applications including **multiple simultaneous video streams**
- Enables red & black relay on mixed networks
- Widely available on TrellisWare & partner radios
- NSA Type 1 and AES-256 SBU Commercial Security
- SBU version of TSM is **non-ITAR**

## Katana™/WREN NB

### Narrowband

- Scalable, self-forming, and self-healing MANET using Barrage Relay networking technology
- Up to three spatial hops (60 km per hop)
- Uses only **50 kHz** of instantaneous bandwidth
- Fast frequency hopping within 200 MHz of bandwidth for **interference/jamming resistance**
- Narrowband physical layer for **excellent propagation and sensitivity** performance
- Scalable to hundreds of nodes
- Katana interoperable with WREN NB at SBU level
- **Field-upgradeable** for current generation TrellisWare radios to support both TSM and Katana
- NSA Type 1 and AES-256 SBU Commercial Security

# WREN: Multiple Independent Levels of Security (MILS)

## Software Defined Radio (SDR) Waveforms

### Warrior Robust Enhanced Networking Narrowband (WREN NB) Waveform

# Katana: Interoperable at SBU Security Level with WREN NB

# TrellisWare Eco-system Uniquely Enables Direct Interoperability

- Simplified Flat Battle Group Network
- Mixed security network: Type 1 and SBU
  - Black relay
  - Coalition communication
- Densification of Network
  - Reliability benefits
  - EW benefits
  - Requires much higher scalability
- Coalition Interoperability
  - Shared common black side interoperability
  - Form the same physical network
- Sovereign Security
  - API based interface for crypto interface
  - Can interface with sovereign crypto
- Uniquely Supported by TSM & Katana/WREN NB

# Waveform Roadmap

# Waveform Roadmap Summary

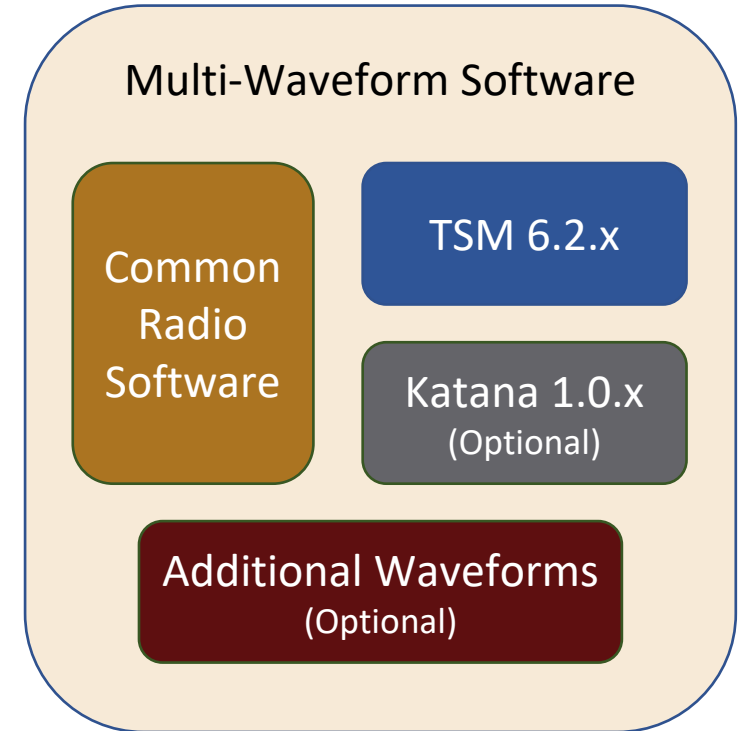

Today

Early 2024

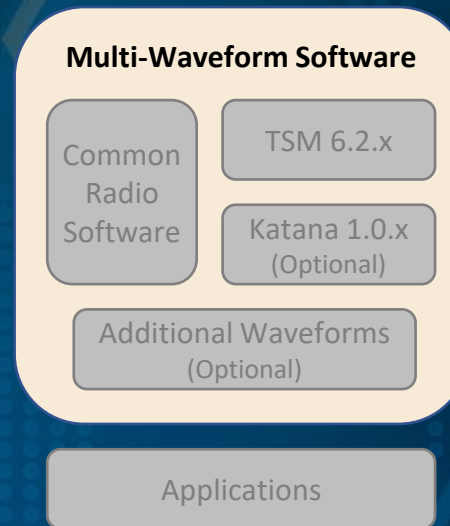

Late 2024 & Beyond

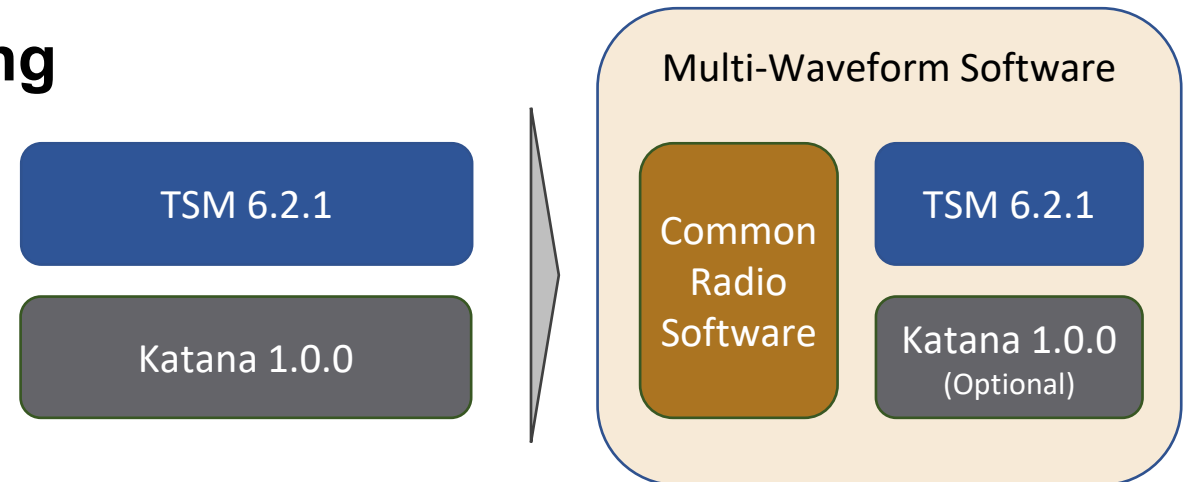

# Multi-Waveform Radio Software

TSM + Katana for TrellisWare Radios

# Next Software Release: “The One with Multiple Waveforms”

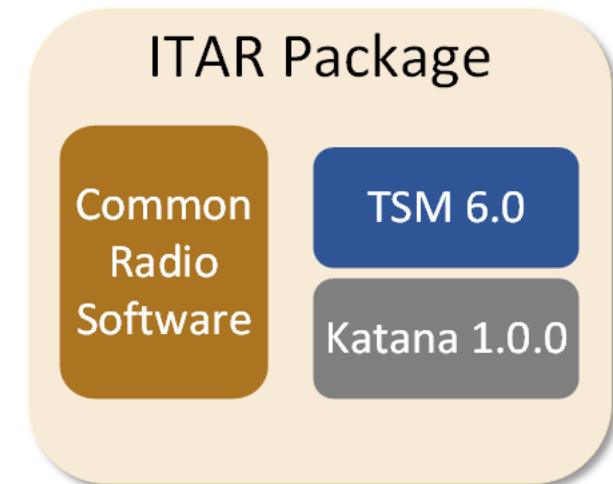

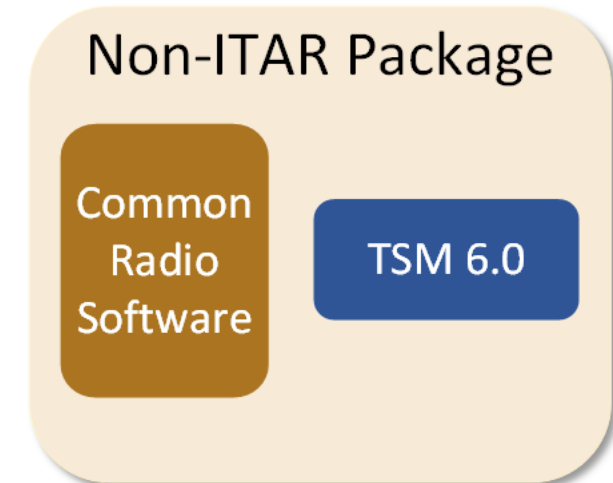

- Use Katana when you need to
- Use TSM when you can
- Supports multiple waveforms in a single software install
  - TSM 6 and Katana initially
  - More to come in future releases
- **Easy and reliable waveform switching**
  - No radio reboot
  - No software re-load

# Multi-Waveform Release: Summary

- **Composed of Two Packages**
  - Non-ITAR Package = TSM only
  - ITAR Package = TSM and Katana
- **Content**
  - Wi-Fi dongle with Katana
  - Zeroize Katana presets
  - Supports Katana on all TrellisWare radios
- **Interoperability with WREN TSM & WREN NB**
  - Transmit, receive, and relay AES-256 SBU (Type-3) traffic
  - Relays NSA Type-1 traffic from partner radios

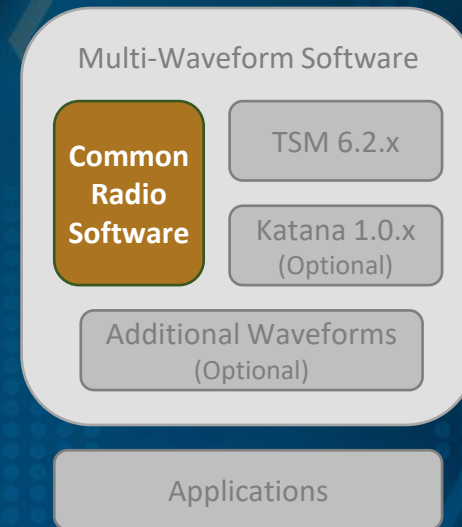

# Common Radio Software Roadmap

Networking, Networking, Networking !!!

Virtual Private Network (VPN)

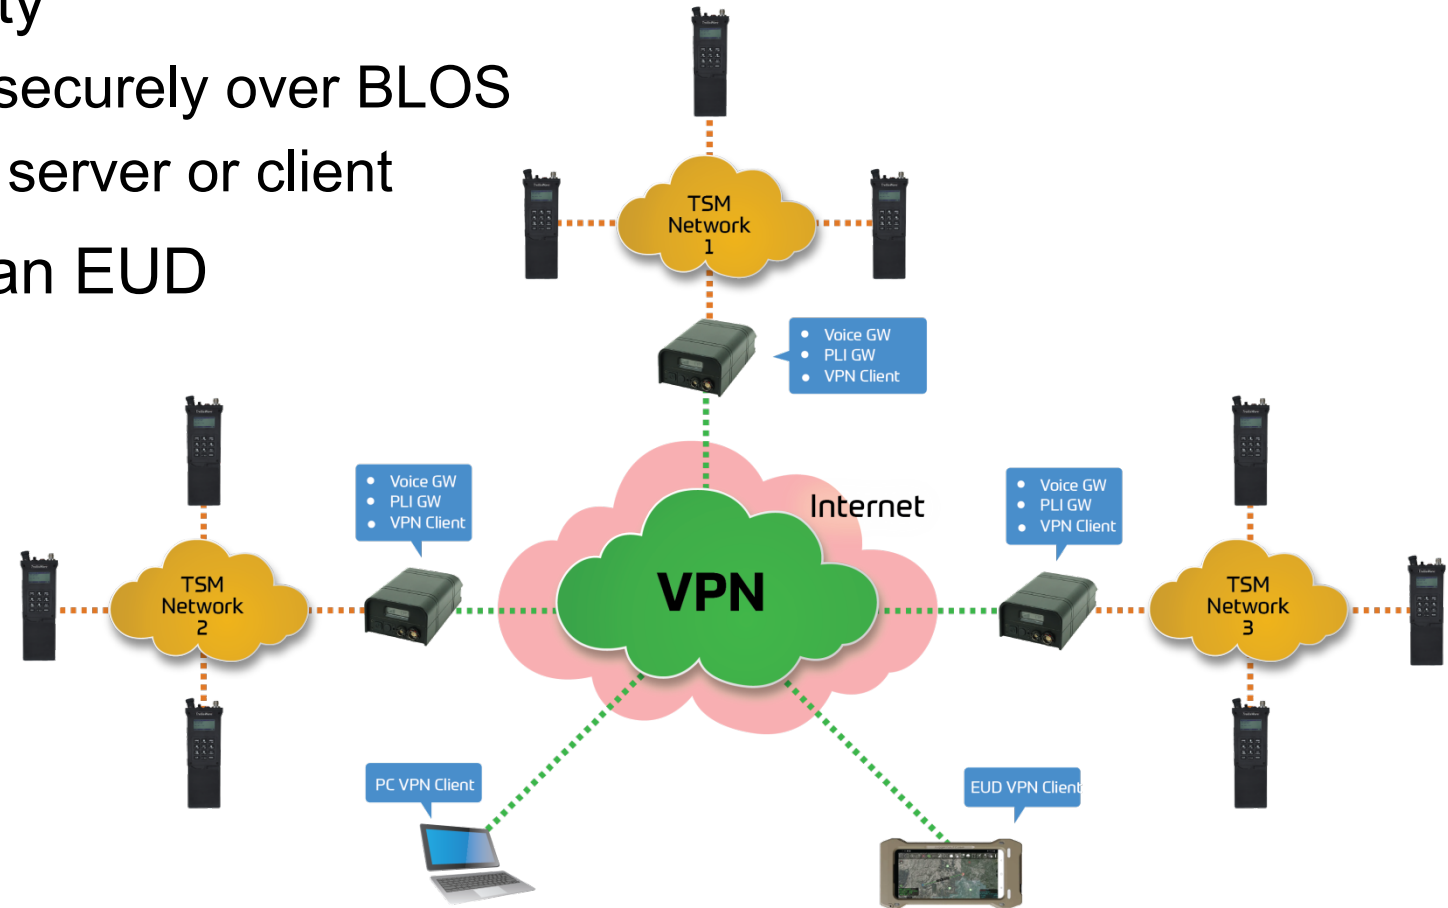

Wi-Fi Client Support

Type-1 Multi-Net Bridge

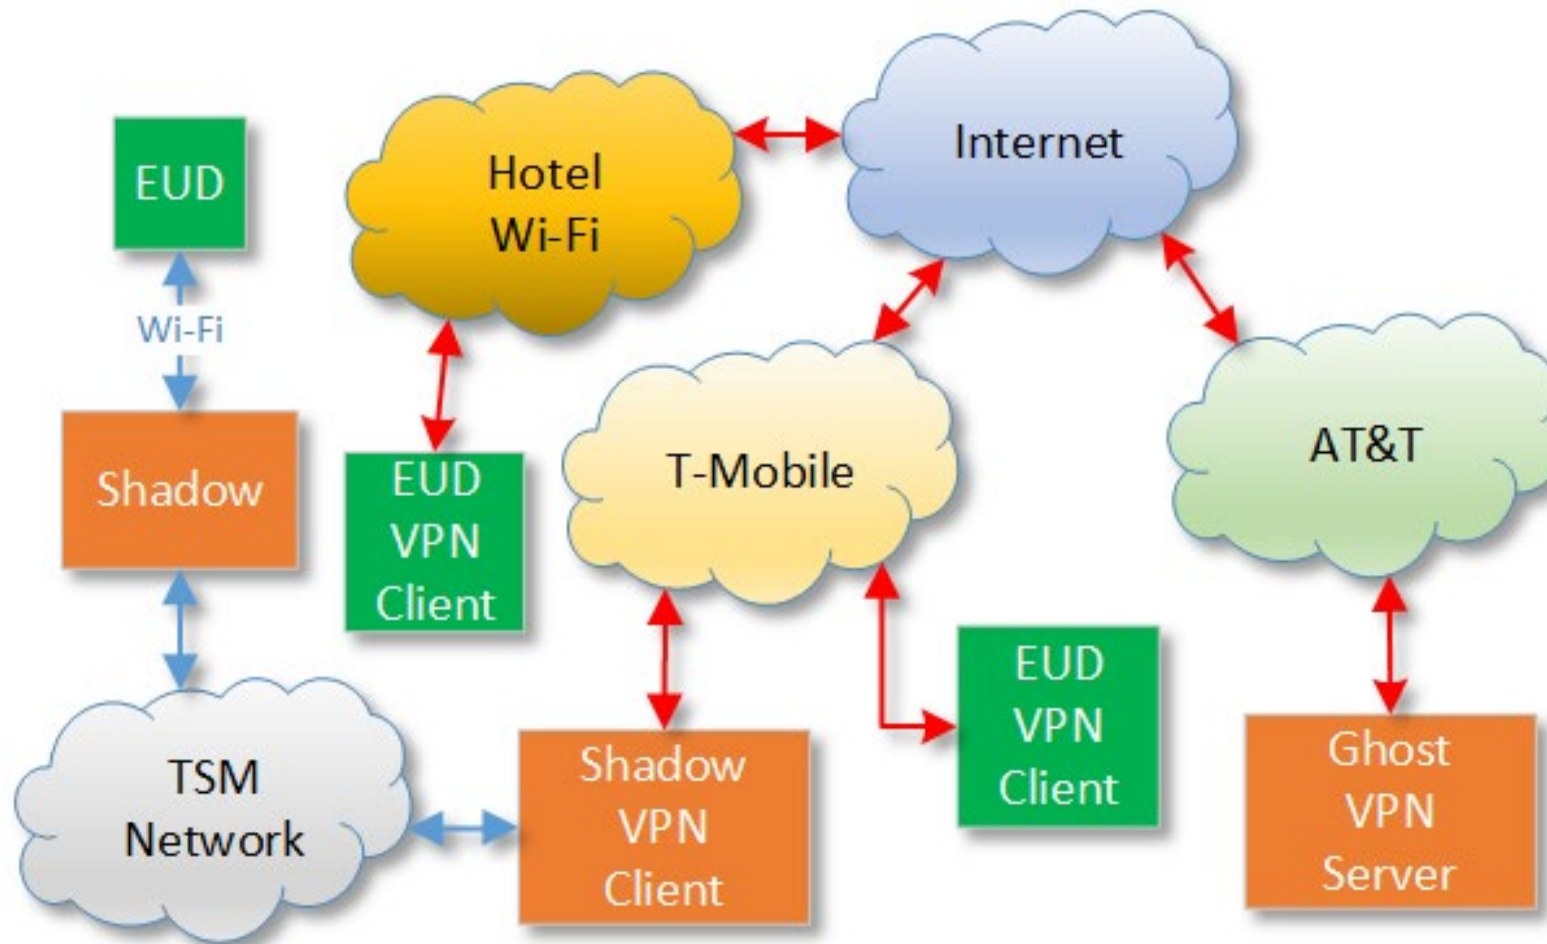

# Radio Features: VPN

- Built-in secure BLOS connectivity
  - Bridge multiple TSM networks securely over BLOS
  - Radios can act as a OpenVPN server or client
- In the future, view PLI with just an EUD connected to the VPN

# Radio Features: VPN Demo

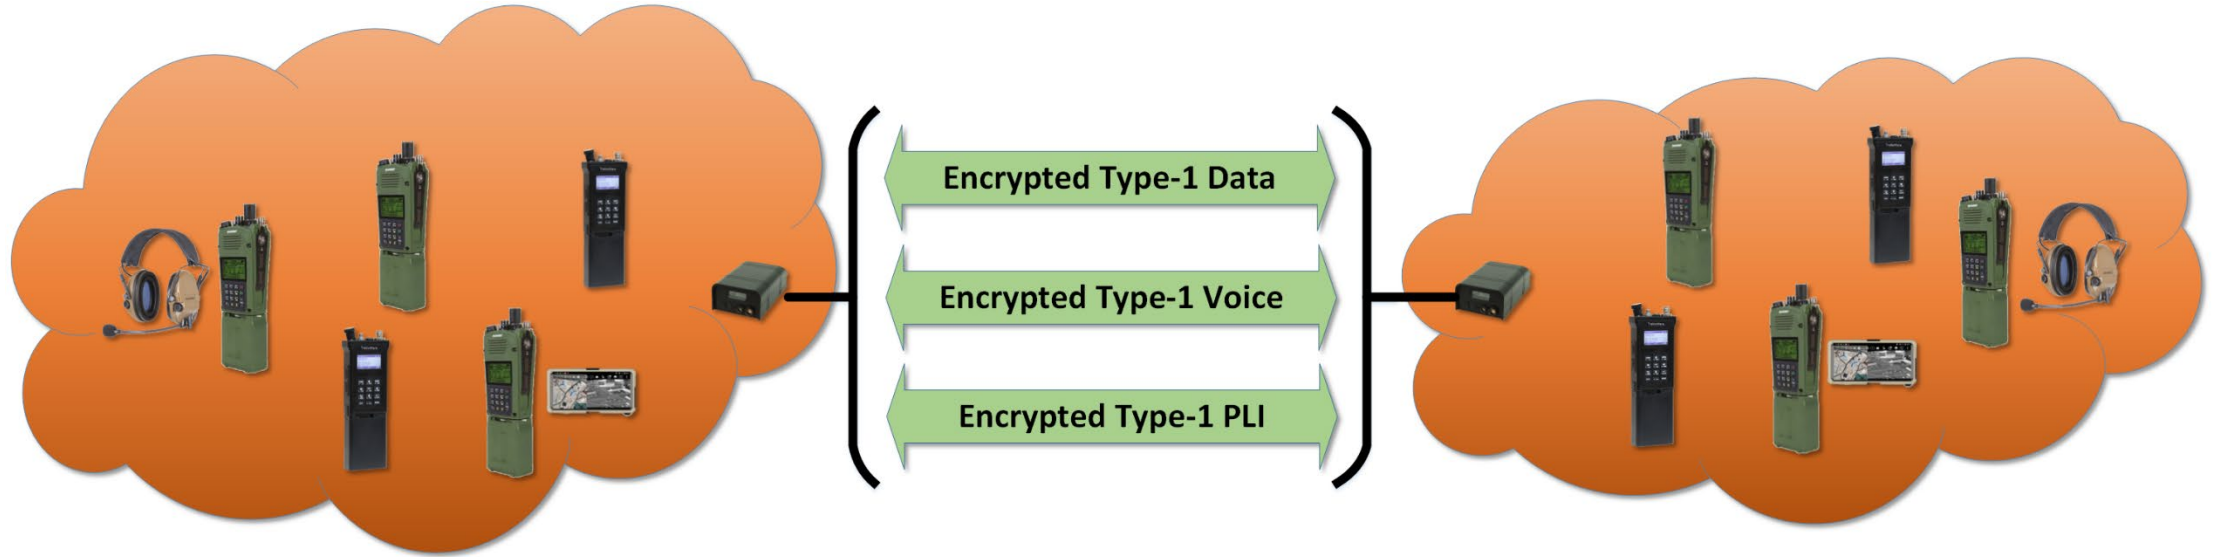

# Radio Features: Wi-Fi Client

- Radio connects to a Wi-Fi access point
- Manage multiple radios attached to a single router over Wi-Fi
  - Preset loading
  - Software loading
- Wireless connection to a router
- Bridge TSM Networks over Wi-Fi

# Type-1 Multi-Net Bridge

Connect Type-1 networks over MNB  
Situational awareness and interaction with all your  
TSM networks

# TSM Roadmap

Data Improvements

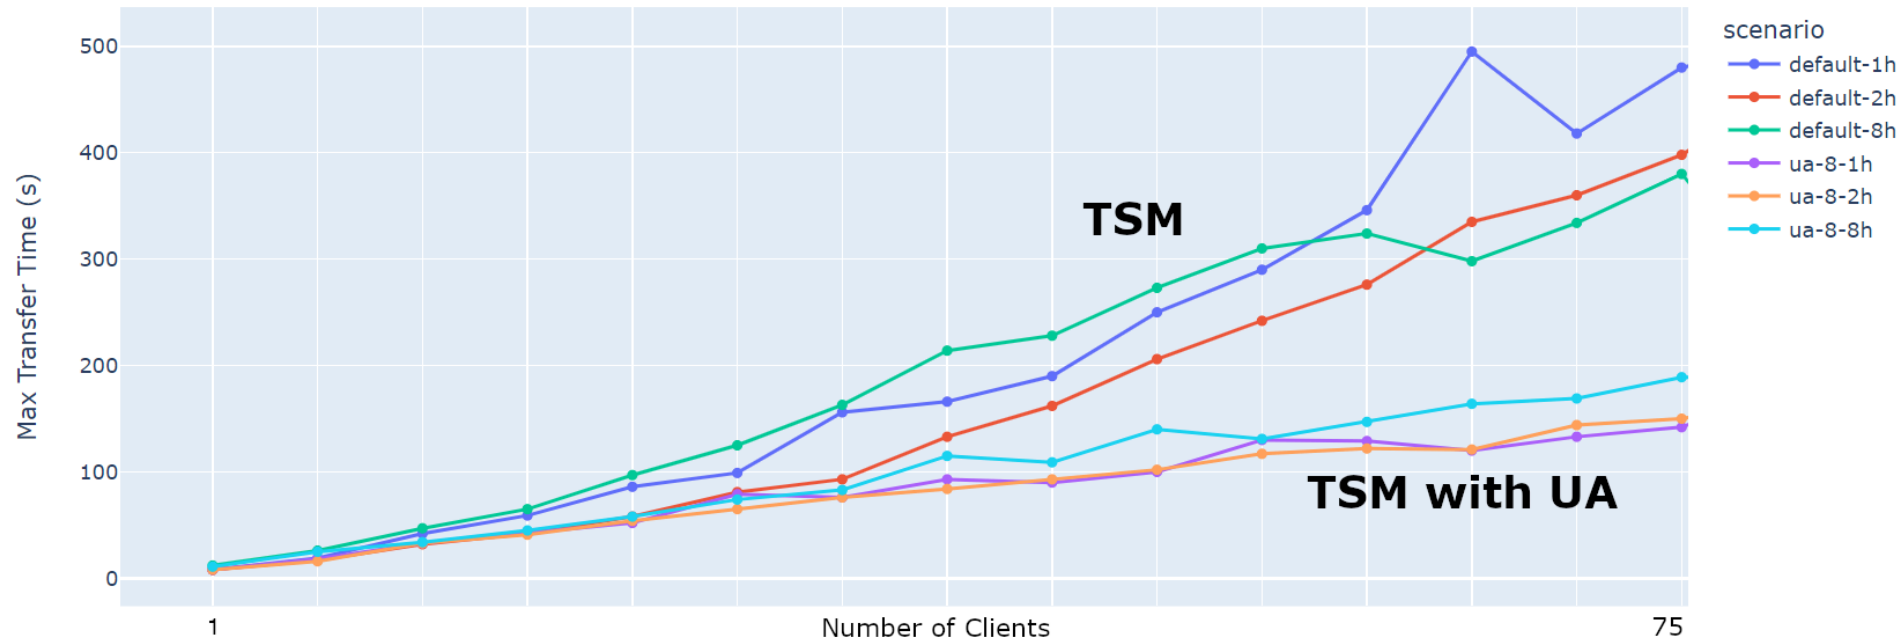

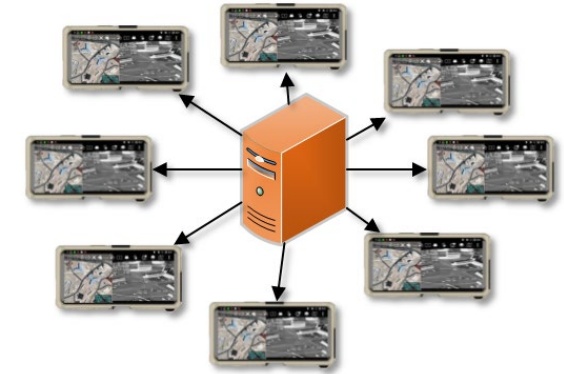

Unicast Aggregation

Low Latency

# TSM: Unicast Aggregation

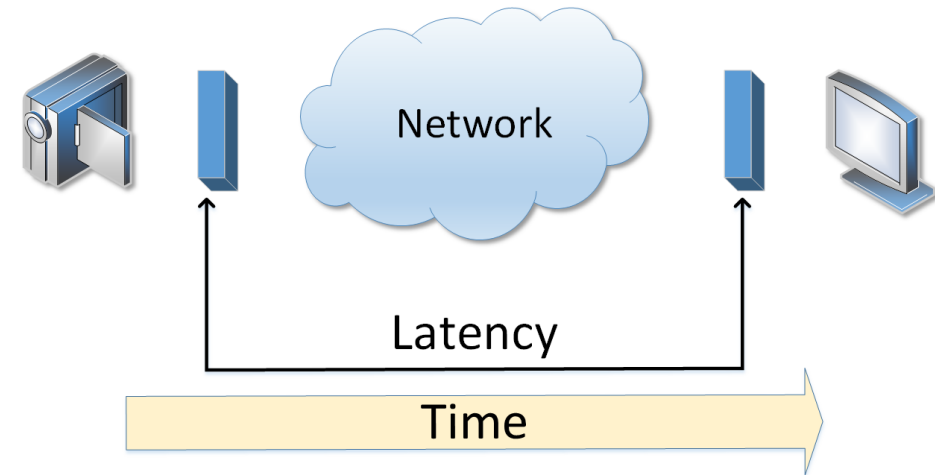

- Improves one to many traffic flows (TCP server/clients)
  - TAK Server PLI distribution
  - Mission Packages
  - FTP Transfers

# TSM: Low Latency

- Teleops, Fires
- What is latency and jitter?
- Supports < 50 ms of roundtrip latency
- Minimal jitter

- Enabled via Mission Profile
- Configured with PPR
- Supports low latency data and regular data in the same network

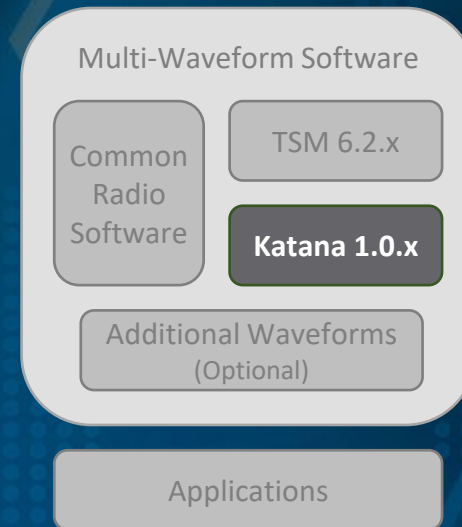

# Katana Roadmap

Usability Improvements

Network Situational Awareness

New Waveform Features

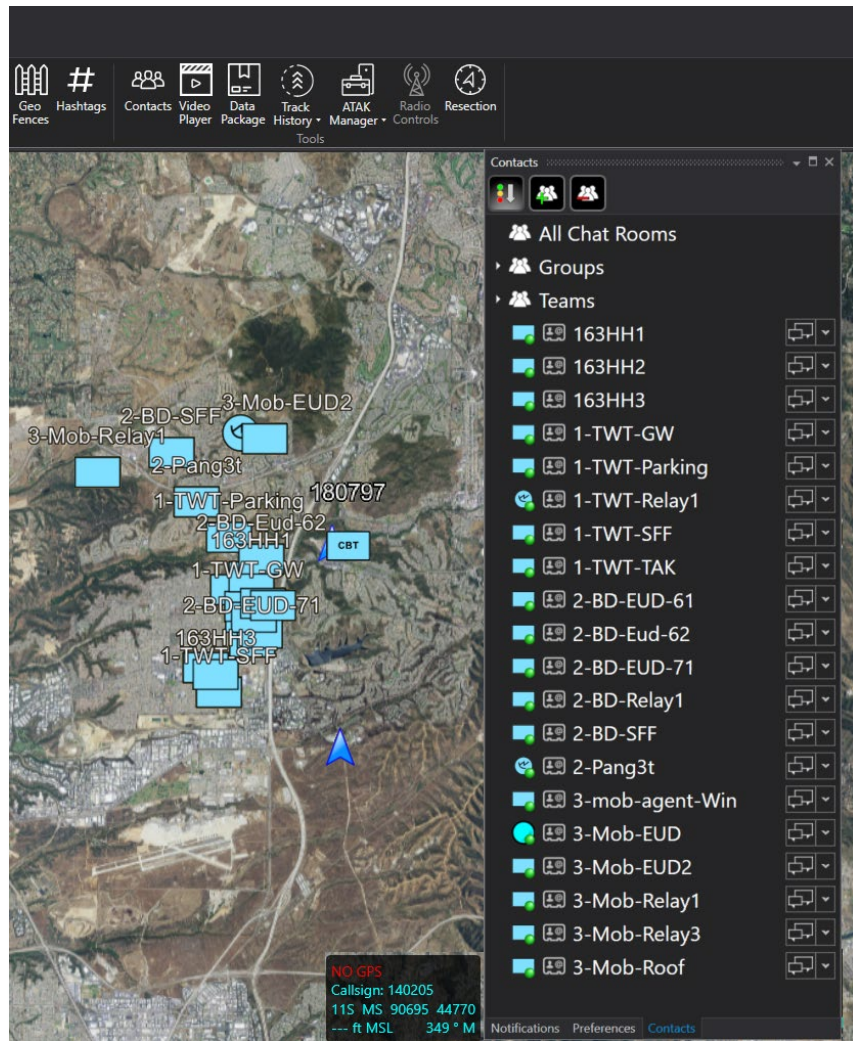

# Katana Roadmap: Summary

- **Early releases were focused on waveform functionality**
- **Next round of releases are focused on usability**
  - Improved TAK integration
  - Network situational awareness
  - Improved radio management via TNC
- **While still leaving room for waveform improvements**
  - 4 hop support
  - AMR support
  - EMCON with PTT and PLI

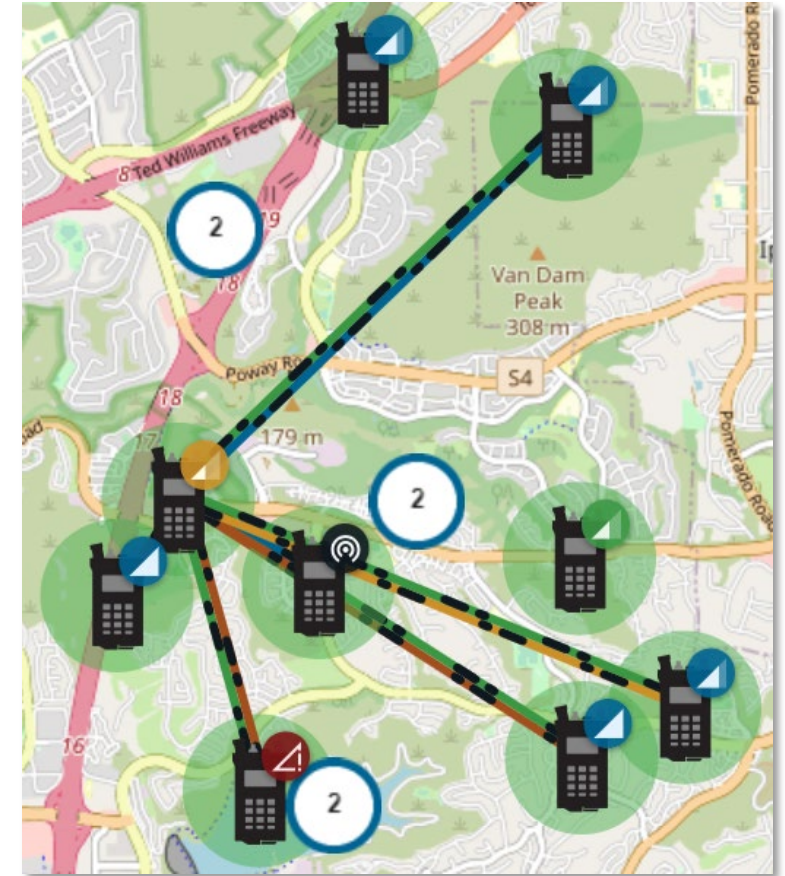

# Katana Roadmap: Improved TAK Integration

- **Make it like TSM !!! Callsigns and Contacts**
- **TAK callsigns on par with TSM**
  - Allow callsigns like “3-three” instead of just “33”
- **Automatic contact list population**
  - An EUD will show up in the contact list when its PLI is received

# Katana Roadmap: Network Situational Awareness

- **Make it like TSM !!! Links, Noise Info and Connectivity**
- Network strength assessment
- Network planning
- Noise info to convey interference
- Links to convey radio to radio connectivity
- Network connectivity to show the impact of link strength and noise

# Katana Roadmap: Waveform Improvements

- **4 hops**
  - Increase maximum hop count to four (preset configurable)
- **AMR Voice Codec**
  - Support for the AMR codec in addition to MELPe
- **EMCON with Voice and PLI**
  - EMCON with Voice will send PLI and voice with a PTT session

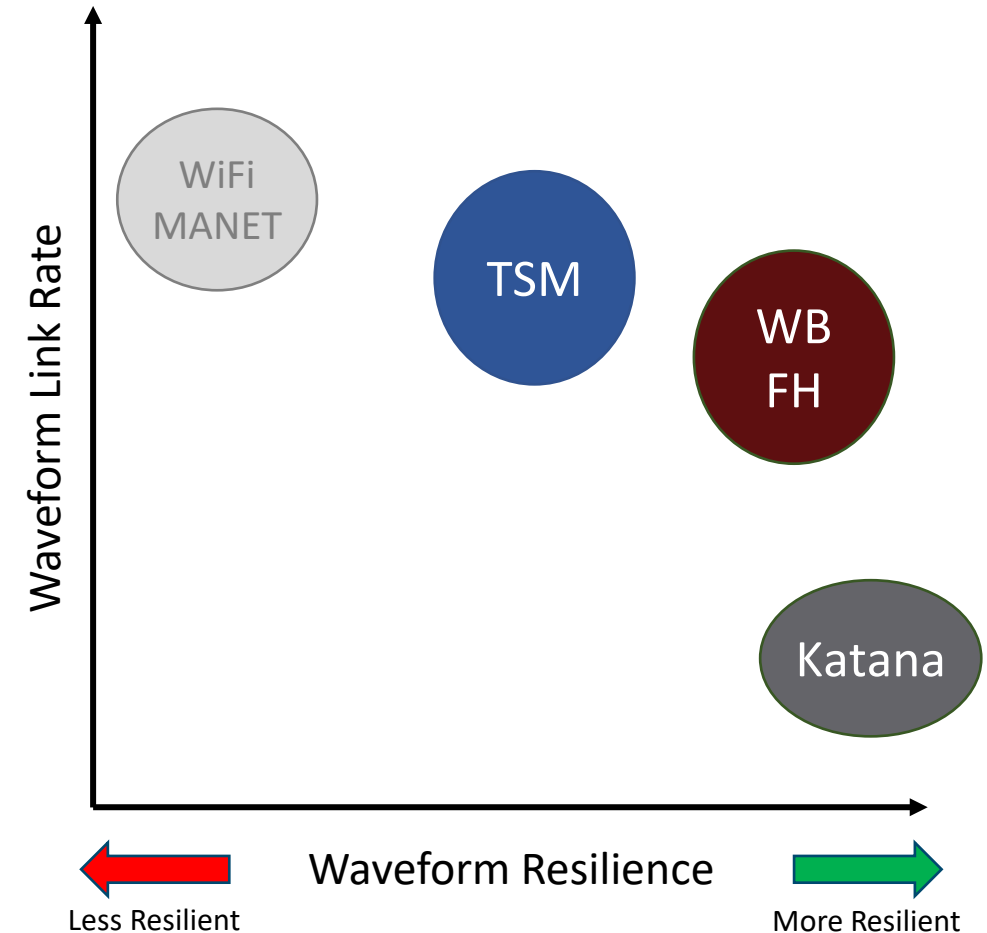

# New Waveform Capabilities

# New Waveform Capabilities

- **Wideband Frequency Hopping MANET**
  - Builds on underlying technologies from TSM & Katana
    - Barrage Relay™ networking
    - Scalability: 800+ nodes
    - Flexibility: 1.2/3.6/10/20 MHz
    - Simultaneous voice/PLI/data/video
  - Configurable frequency hopping
    - Supports >1 GHz hopping bandwidth
    - Full frequency band support: UHF/L/S
  - Increased resilience in interference environments
  - Similar data capability as TSM

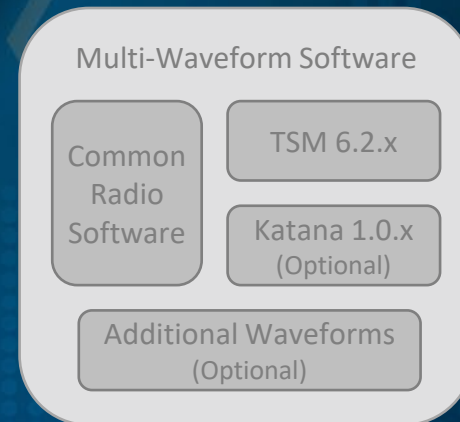

## New Waveform Capabilities (2)

- **Distributed Beamforming (DBF)**
  - Focus combined power from multiple radios toward a selected destination
- **Narrowband Line-of-Sight (NB LOS)**
  - Previously available (pre-2018) capability returning
  - AM/FM Interoperability
    - 6.25/12.5/25 kHz
  - Support over UHF/L/S bands
- **Low Probability Detect/Intercept (LPx)**

# User Applications

**Applications**

# TW Application Suite

TrellisWare Network Controller

TrellisWare Management Tool

TrellisWare Connect

Software Download Tool

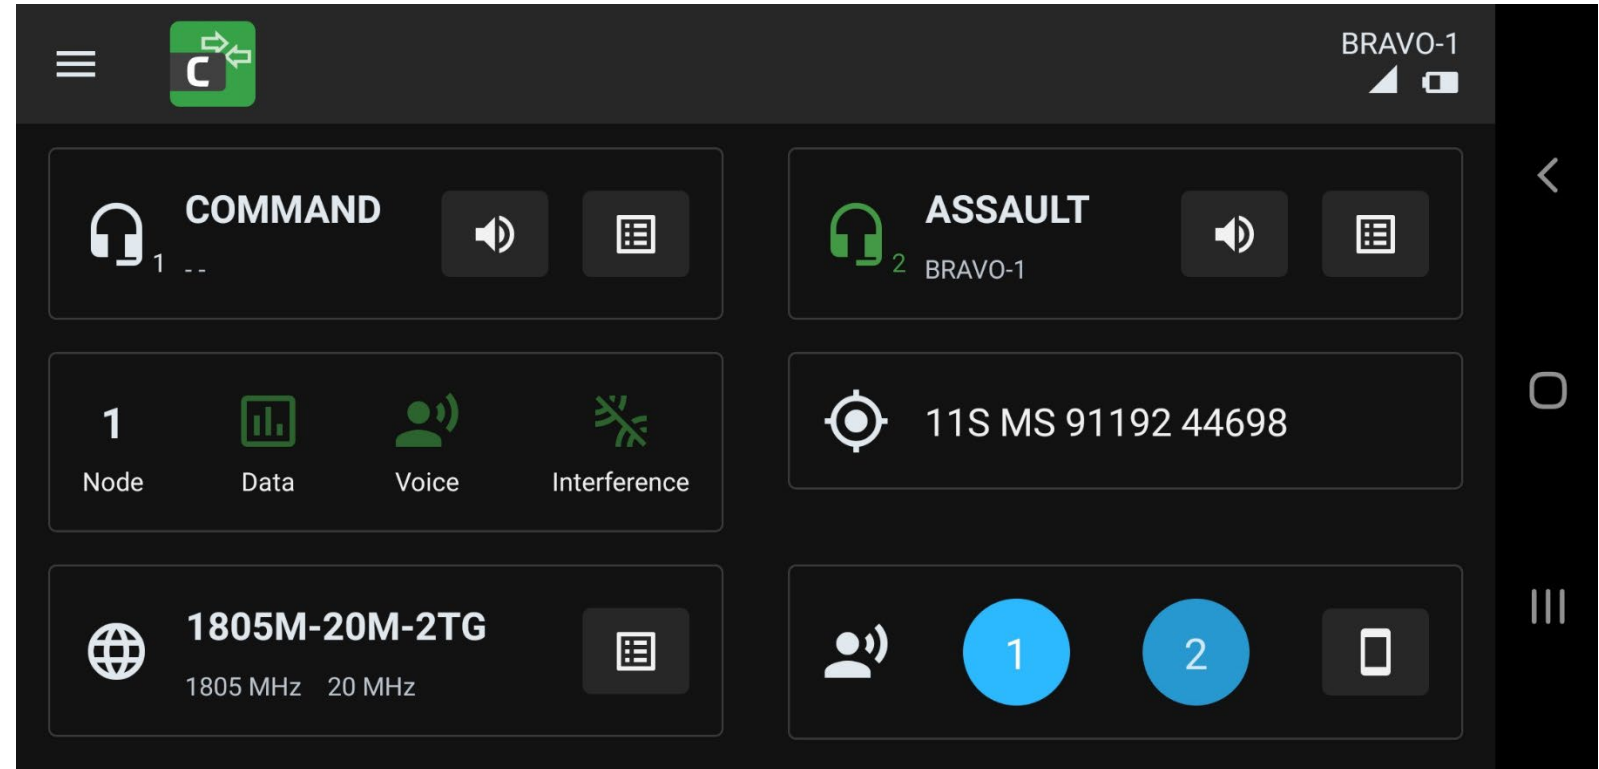

Data Capture Playback Tool

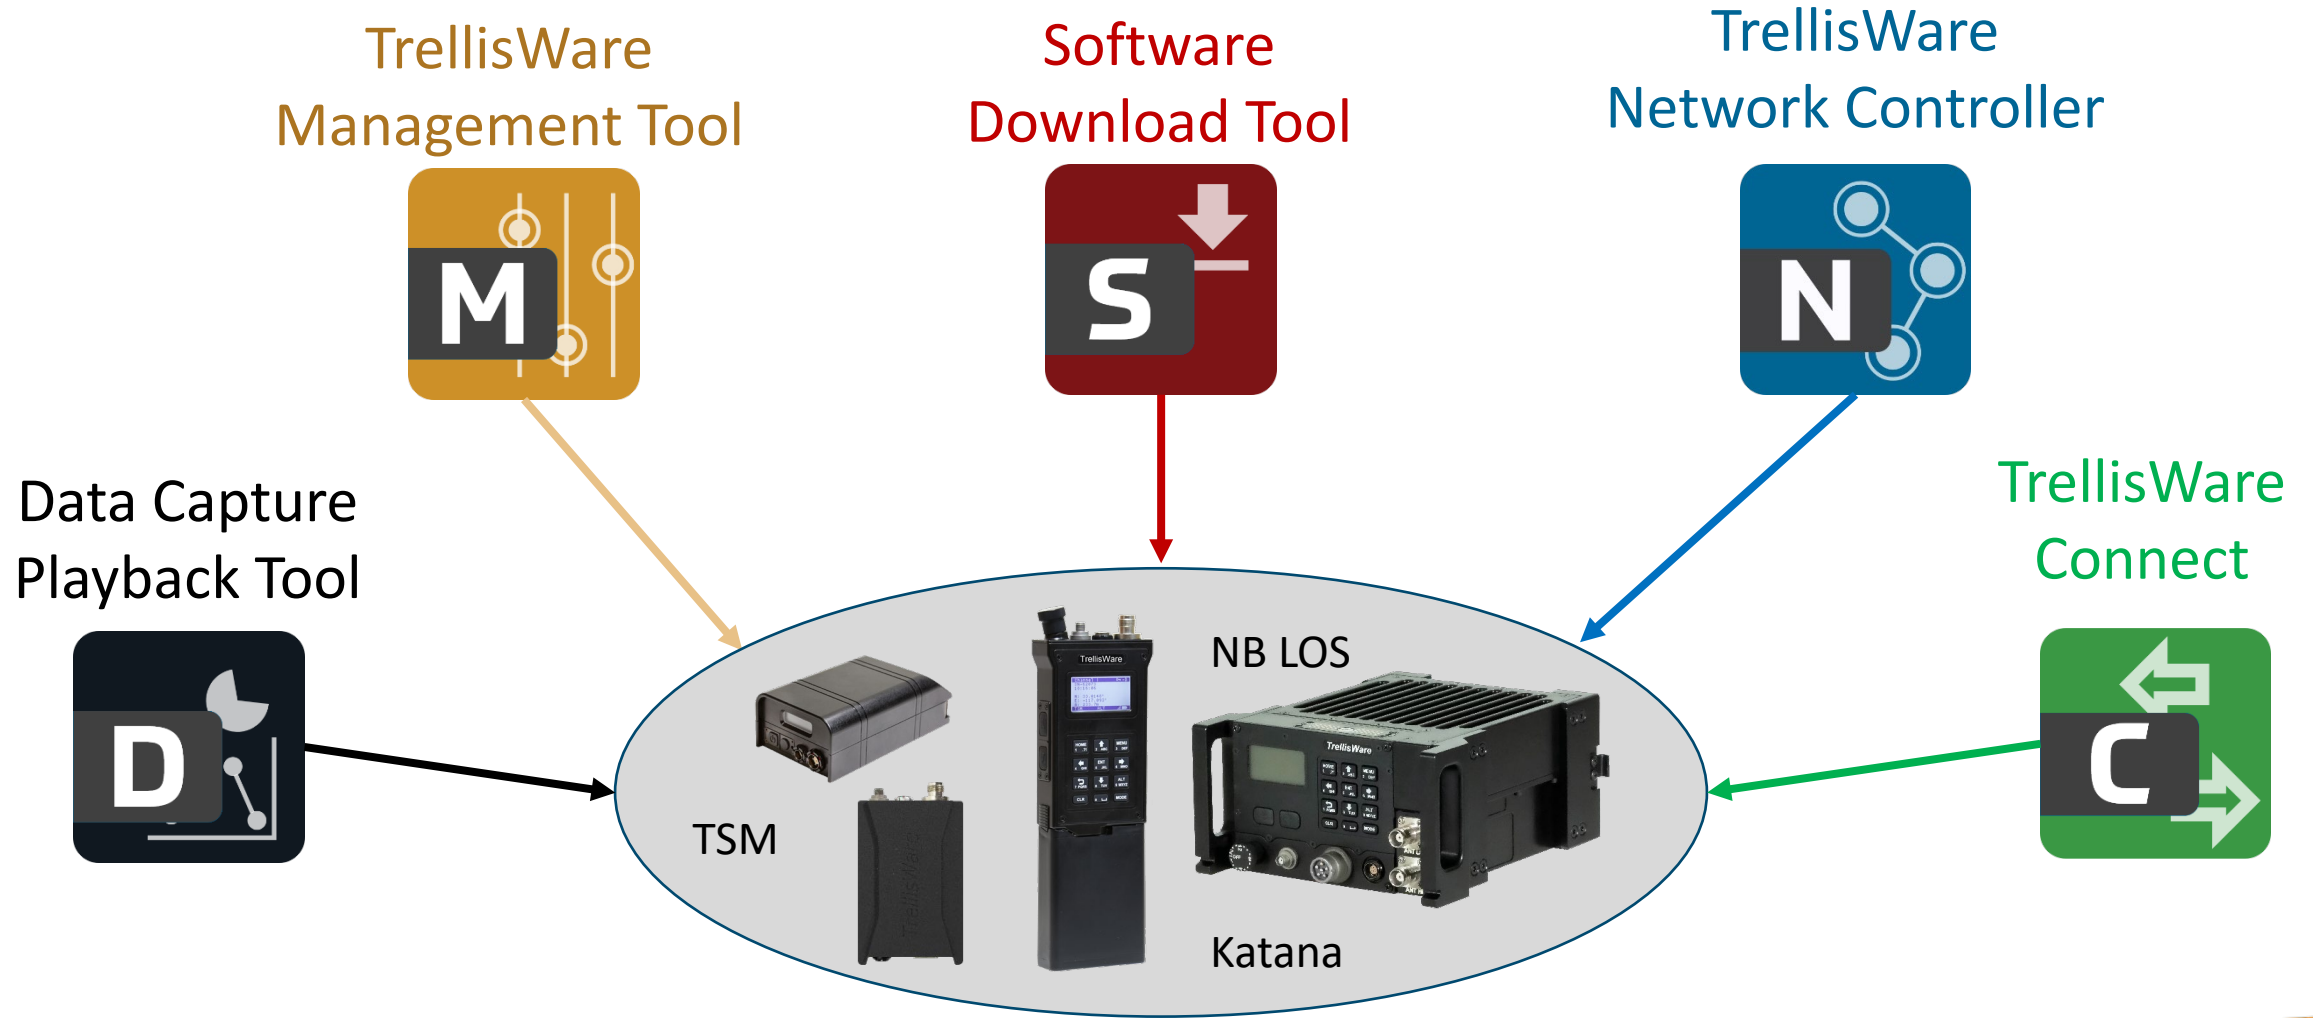

# TW Connect

- Android application that allows users to control their personal radio, view limited network information, and use the Android as a PTT audio accessory for the radio
- PTT capability is overlaid in other apps like ATAK
- Evaluated and selected by a US DoD customer, fielding to occur in the coming months
- Version 1.0.0 is available on the TW Support Site

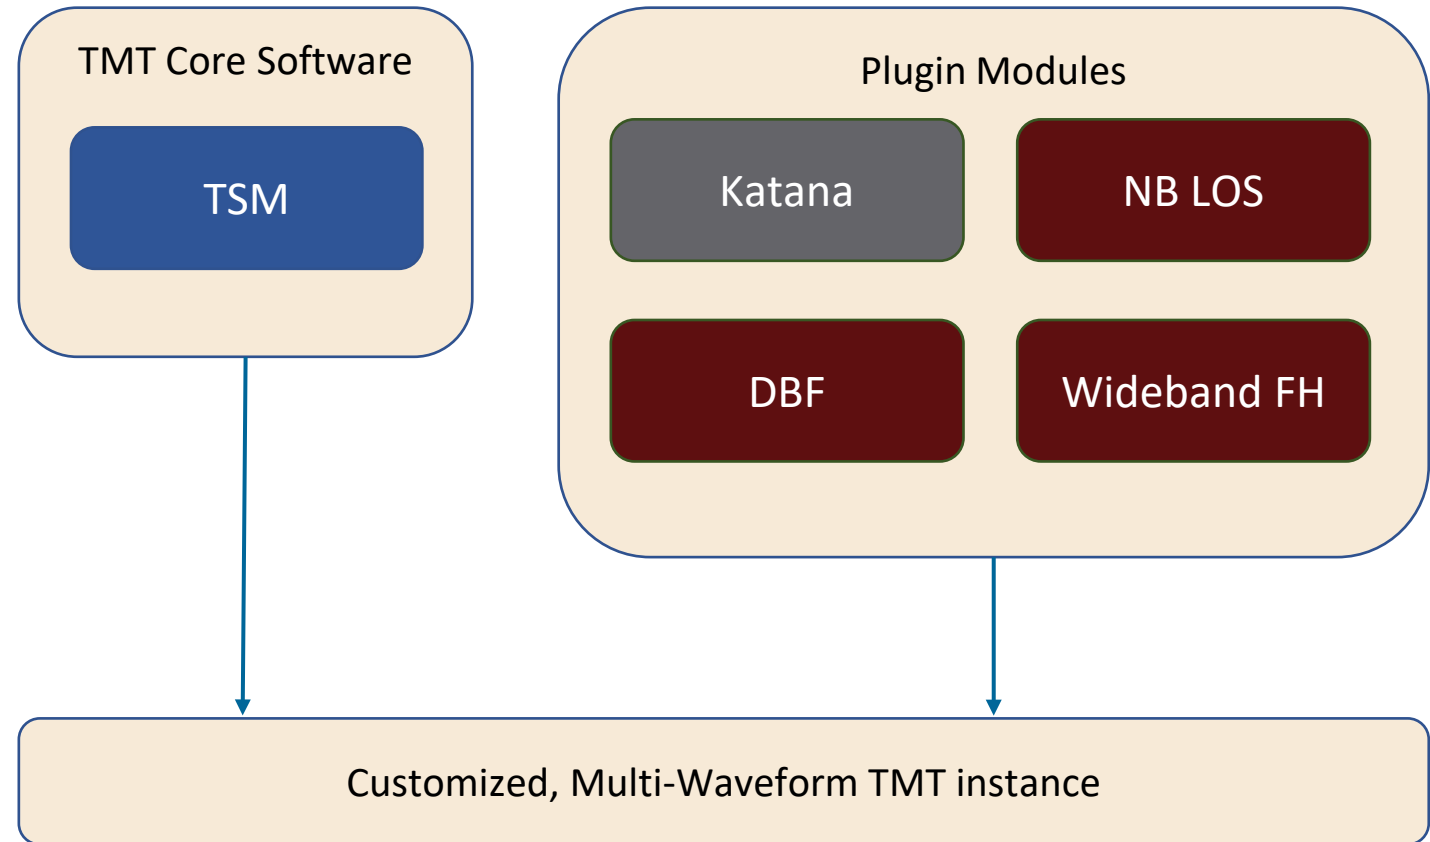

# Familiar Workflow for Easy Adoption

# TMT - Improved Multi-Waveform Support

- TSM, Katana support exists today
- Shifting to a modular system for multiple waveform support
- Tailorable to end-user needs
- Future waveform support just requires a new plugin

# Language Support

- Expanding the supported language options within the apps beyond English
- Ideal for international customers, SOF customers working with partner forces

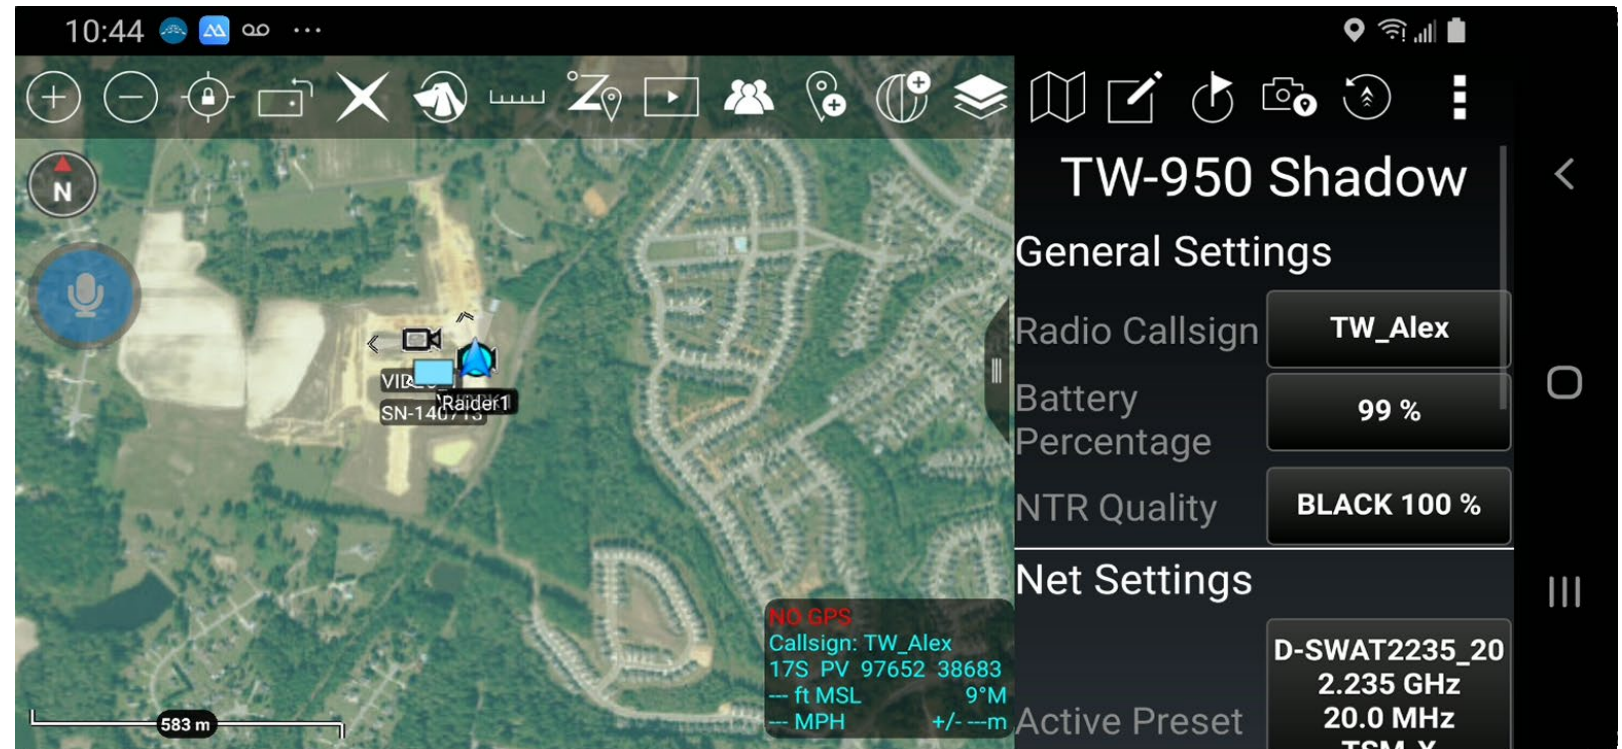

Dispositivo	modelo	Nivel de batería	Conectividad a NTR

7 dispositivos (7 activos, 0 desconocidos)

# ATAK Applications

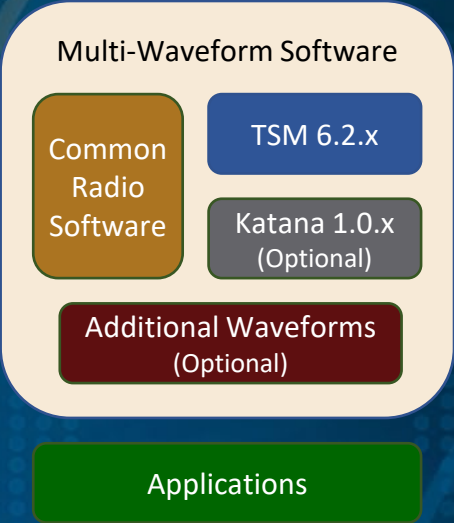

- Partnering with Aries Defense to further develop the TW Config ATAK plugin
- TW-developed prototype NORM plugin for improved file transfer over TSM and Katana

# Waveform Roadmap Summary

# Waveform Roadmap Summary

Today

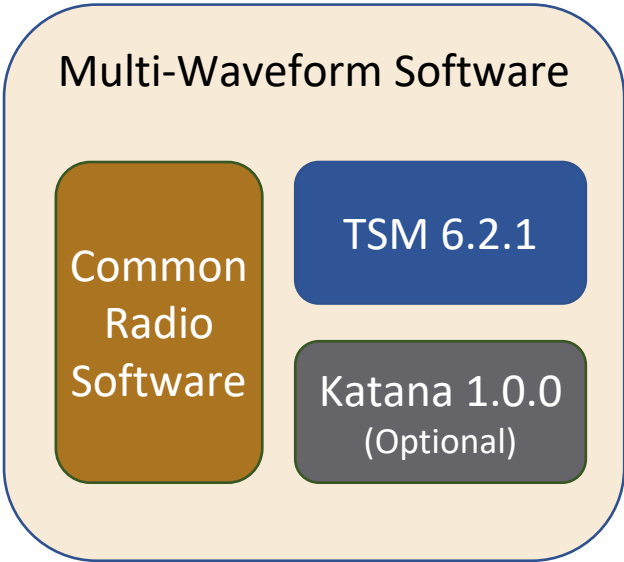

Early 2024

Late 2024 & Beyond

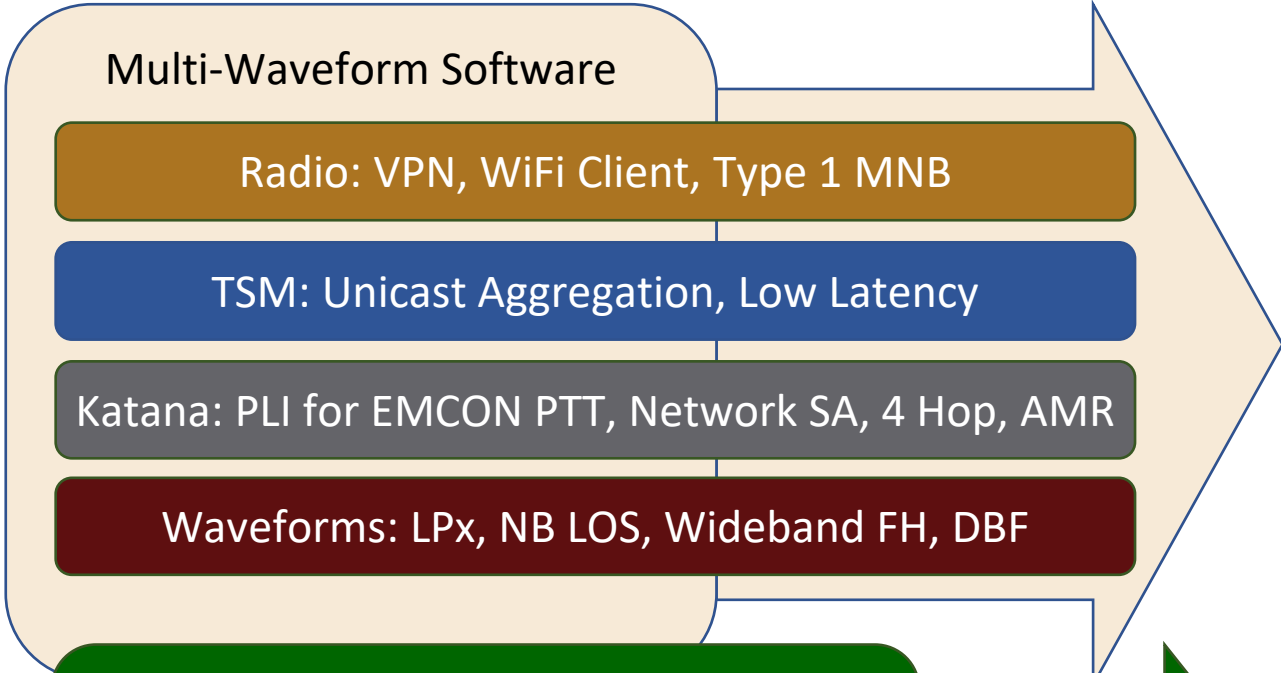

TSM 6.2.1

Katana 1.0.0

Applications

- Multi-waveform TMT
- Improved TNC for Katana
- ATAK: TW Config (TSM)

- Language support
- Apps updates for Katana (TNC, TWC)
- Apps support for new waveforms
- ATAK: NORM, TW Config (Katana)

THANK YOU
